Hi Ed, Thank you for sending me the report. I am looking at it more from the perspective of what standard information do we need to include in reports. This report was very informative and easy to follow for a broad audience.

· I truly appreciated the sunken oil survey technique. I have bad memories of expensive analytical surveys that were not definitive due to background oil.

· I'm interested in KPIs used in the ICS reports. I have learned that terms used in the KPIs can be misunderstood by a broad audience. Here is a suggestion, but I'm just thinking outside the box. If you include a table of the KPIs in the report, you have the opportunity to fully explain the definitions of terms used in the KPIs, to prevent misinterpretation in future use of the data.

Thank you,

Judy
